## SV100

### SV100 TWO PACK EPOXY

Is a 100% solids two pack epoxy system free from solvent and water, can be used as a pigmented coating for concrete floors, as a binder for high build sand filled epoxy floor coatings 2-6mm thick.

Is highly suitable for hospitals, commercial kitchens, laboratories and cool rooms for its hygiene properties and food processing industries, garage or work shop floors because of its high chemical resistance.

It is also compatible with On-Crete's Coving material for a seamless finish between your flashbacks and floor.

### SV100 COLOUR CHART

# FLAKE

PROCRETE POLYMER FLAKES incorporated in seamless epoxy and polyurethane floor systems are a great alternative to other types of floor / wall coverings. The decorative flakes are colourful, tough, low maintenance, seamless, durable and hygienic coating systems for floors, walls and other surfaces for commercial, institutional and domestic areas.

**Procrete flake flooring** is extremely durable and has a long lasting floor surface. The polymers used give abrasion and impact resistance and when used with a high performance urethane as topcoats form an extremely durable and long lasting floor surface.

**BENEFITS TO FLAKE:**

- > Seamless Surface
- > Graffiti Resistant
- > Water Resistant
- > Great for High Traffic Areas
- > Will not harbour Bacteria

## FULL COLOURED EPOXY FLOORING

Do you have a dusty old garage or factory floor? Tired of cheap concrete paints falling apart? Use On-Crete Australia's SV50 Water Based Epoxy to give you a durable, easy to clean full coloured floor. The low cost and low odour makes it such a versatile coating being applied on small and large applications such as warehouse floors to home garage floors. For extended life and improved scratch resistance use one of On-Crete's Polyurethanes as a clear protective coat.
